Attachments: EPA - IAQ Management Plan_Boots Construction.pdf

Ray and Mike,
attached below is the full IAQ plan from BOOTS, as discussed during the Health and Safety meeting last week. Let us know if you have any questions or comments.
I don't think that we have an answer yet to the question of what additional particulates would EPA like to sample for, other than dust, before during and after construction?

Did you already receive it from Chad? Apparently they sent it directly to someone at EPA.

Charlie Petersen
Project Manager

Attached is the IAQ management plan. The GC sent this directly to EPA. I let him know to funnel everything through me first from now on.
